PROJECT SUMMARY

Motivated MERN Stack Developer with 3 months of hands-on experience in building web applications using modern JavaScript technologies. Passionate about full-stack web development, learning new technologies, and building scalable, user-friendly applications. I am a quick learner and has a problem-solving mindset

TECHNICAL SKILLS

Web Development:	Frontend & Backend Development
Frontend:	React.js, JavaScript, HTML, CSS
Backend:	Node.js, Express.js
Databases:	MongoDB
Architecture & Design:	Repository Architecture, Schema Design, Object-Oriented Programming (OOP)
Development Tools:	Git, GitHub, Eclipse, Postman, Thunder Client, Mongoose, Visual Studio Code
APIs & Networking:	REST APIs,, Razorpay, Stripe.
Core Expertise:	Data Structures & Algorithms, Debugging, UI Designing, API Development,

EXPERIENCE

MERN Stack Developer

3 Months Experience - Developed responsive web applications using React.js - Built backend APIs using Node.js and Express.js - Integrated MongoDB for data storage and management - Worked on both frontend and backend features. deep researching mindset.

PROJECTS

• **FOREVER** — Full Stack E-Commerce Project (2025) [🔗 LIVE LINK](#) — [🔗 GITHUB](#)

Developed an e-commerce platform for online shopping of Clothes, enabling customers to shop digitally and admins to manage orders with user Details.

- Implemented role-based access for users, experts, and admins with JWT.
- Built online ordering with product browsing, cart, and order tracking.
- Integrated secure payments via **Razorpay**, **Stripe** and Cash on Delivery..
- Designed admin panel for managing products, orders, and user Details.
- Implemented authentication with **bcrypt** password hashing
- Supported image uploads via **Multer** and **Cloudinary**.
- Implemented OTP verification using **Nodemailer**
- Implemented Cancel And Return scenarios.

[🔗 Live Preview of Admin](#)

ADMIN EMAIL: muhammedzamil38@gmail.com

ADMIN PASSWORD: vnkpsjiiqwispffw

Technologies used: Node.js, Express.js, React, MongoDB, HTML, Tailwind For CSS, JavaScript, Stripe,Razorpay, JWT, Multer, bcrypt, Axios, Cloudinary, validator, and nodemailer

• **NETFLIX CLONE** — A CLONE OF NETFLIX USING TMDB API [🔗 LIVE LINK](#) — [🔗 GITHUB](#)

This is a website which is a clone of Netflix. It uses API to fetch movies and display it on the UI. And we can see the trailer when we clicked on any thumbnail of the movie with React-Youtube Library.

- Listed movie separately (eg: Horror Movies, Action Movies etc).
- Trailer pops out when clicked on any movie thumbnail.
- Fetches Api from tmdb (The Movie Data Base)

Technologies used: React.js, TMDB as API, HTML, and CSS, and React-Youtube.

MINI PROJECTS

CALCULATOR PROJECT

[🔗 LIVE LINK](#) — [🐙 GITHUB](#)

Build a simple calculator using JavaScript's `eval()` library. User can do calculation and clear it afterwards

Technologies Used: HTML, CSS, and JavaScript

WEATHER DASHBOARD

[🔗 LIVE LINK](#) — [🐙 GITHUB](#)

Built a simple Weather dashboard. the Weather api is fetching from the OpenWeatherMap API user can enter the place and the weather of that place can be seen in the UI

Technologies Used: HTML, CSS, JavaScript, and openWeatherMap API

EDUCATION

Prototype, Kozhikode

2025 – 2026 — (Ongoing)

Currently enrolled in an intensive training program focused on MongoDB, Express.js, React, and Node.js, with hands-on projects in full-stack web development.

Class: 7

(Ongoing)

Currently pursuing secondary education
